View of main aisle in one of the intermediate stack levels of five tier Art Metal Bracket Type Bookstack. The Shelf supports for stack columns are the heavy type. Vertical receways are included in stackcolumns permitting the use of countersunk control switches. The Enclosed section is for safekeeping of rare books. The partitions are removeable, permitting extending of area or relocating of same. The 5th deck floor is the floor of the auditorium with stage, dressing rooms and other facilities for theatricals and meetings. Construction arranged for installation of two additional tiers in the auditorium space eventually making a 7 tier stack. The bookstack construction in addition to supporting auditorium floor also supports the roof.

View of side aisle at front of carrels and at end of ranges. This is a view of an intermediate tier in the five tier Art Metal Bracket Type bookstack built to carry two additional tiers of stacks, also the roof construction. The 5th deck floor now serves as the floor to the auditorium, with stage, dressing rooms and other facilities for theatricals, meetings, etc. The live load of the auditorium floor is in keeping with the building code governing public assembly rooms.
